

worksurfaces

The information listed below provides you with basic features of Compile Worksurfaces.

- Compile thermally fused Worksurfaces are 1" thick and are finished with 3 mm PVC edging on all sides.
- Worksurfaces are predrilled to enable proper alignment with worksurface supports.
- Standard laminate offerings are available in thermally-fused (T). See laminate listings for details.
- Laminate Worksurfaces will have matching woodgrain trim only.
- Depth of the Worksurface scoops are 1 1/8" when measured from the Panel the Worksurface is attached to.
- All Worksurfaces require support items. These are priced separately within this section.
- Grain Direction for Worksurfaces are as follows:

CHEP End Panels

CWCC Worksurfaces

CWS Worksurfaces

- Communication and electrical wires are routed through a cable scoop located at the back of the Worksurface. When specifying a Straight Worksurface (CWS) or a Curvilinear Worksurface (CWVL), note that the number of cable scoops depends upon the width of the Worksurface. All other Worksurface shapes have one scoop on Panel edges.

One Scoop
CWS 24" – 48"

Two Scoops
CWS 54" – 84"

This page provides a three dimensional view of a sample configuration highlighting each **Worksurface** component required when specifying this configuration.

WORKSURFACES

CWS - RECTANGULAR WORKSURFACES

- All tops are thermally fused 1" thick with pilot holes to enable proper alignment with worksurface supports. Wood screws must be used.
 - Compile worksurfaces feature a 3mm edge.
 - Support hardware must be ordered separately. See the listings in this section.
- Width and depth dimensions listed include a nominal measurement (3/8") to account for wire management between the worksurface and adjoining panel.
 - All surfaces over 48" will have two scoops, all others have one.
 - Worksurfaces greater than 48" wide require additional structural support.
