

PANEL REVEAL OPTIONS

Evolve offers two different paint options for panel interior frames and connectors.

- Paint with Matching Horizontal Reveals.
- Paint with Black Horizontal Reveals.

KEY FEATURES

- The Black Horizontal Reveal option will create a cleaner aesthetic by minimizing the appearance of the slots on lighter color panel frames.
- Models that have additional trims will be listed with the option for Black Reveal. Fabric Extension Modules do not have additional trims. Inline Connectors, without additional trims, should be selected with Black paint only.
- For add-on orders for existing installations with Matching Horizontal Reveals, please select this option.
- For new installations, we recommend selecting the Black Horizontal Reveal option.
